In essence, our action was in technical violation of the rule that personnel requisitioning should be accomplished only if accommodating positions and ceiling exist. In recognition of this fact, our actions were tempered to assure that:

- a.) The military manning requirements we were meeting were in fact critical; and
- b.) No irrevocable commitment was made to any individual without accommodating cetling.

4. Processing Time

A comfortable lead time for ECBing a military detail is il months. An uncomplicated case runs anywhere from 71 to 9 months. With excellent support from cognizant offices this lead time has been substantially reduced and we have every expectation that it will be reduced further. However, in view of this lead time and if we had deferred personnel requisitions until we had accommodating position and ceiling, we would not have been ECDing required manning and the CKCART forward bases until the spring of 1964 at the earliest. Because of our earlier action in December of 1962 and April of 1963, needed personnel are, have, and will be reporting to these sites and we contemplate almost full manning for them by the end of the year.

5. Other Manning Areas of Concern

Under the terms of our authorized strength approval we have technically been adsonished not to take action to fill vacancies where no position has been approved. However, a valid requirement exists for certain Headquarters personnel now. To accommodate these individuals we have had to resort to the practice of double slotting. However, we have gone slow in this area to assure that we would not open surselves to the charge that our trouble is not calling but improper use of available ceiling.

In the preparation of our proposal we did all within our power to reduce the Agency's manning burden by seeking manning aid from the USAF. This was approached with caution to assure that we did not lose effective control over bey personnel. Two areas were selected for USAF manning and involved a total of A counitment was obtained from Colonel Geary that he would provide manning for these spaces. To this point implementing this commitment has proven fruitless and we have already EODed personnel against our ceiling and are requisitioning the to EOD in late becamber 1963. In connection with these it has been suggested by members of Colonel Geary's staff that they be absorbed by the

they be absorbed by the which will be
sade available when the Supply Depot mauning responsibility
is transferred from the Agency to the USAF. This swap
sooms reasonable if we can get authority to accomplish it.
The actual transfer of the Depot in mo far as it will affect our manning totals is about 8 months downstress at this time.
7. A summary of OSA's manning posture as a result of the above actions is attached.
the space activity to structure.
